FAQs

Q: What is the catch?

A: There is none! No additional purchase is necessary. This is just our way of saying "**THANK YOU**" to a very supportive community.

Q: How often can I get a refill?

A: Once a month, no more than 7 days early, unless prior arrangements have been arranged.

Q: What if I don't need a prescription filled but I need the vitamins refilled?

A: No problem. If you're in the program, you can receive your child's free vitamins each month...NO purchase necessary.

Q: How can I continue receiving free vitamins after the first year?

A: A family that has at least four other prescriptions filled at our pharmacy during the previous year, will be entitled to the next year free. To qualify more than one child, multiply four prescriptions times the number of children in the family.

Dear Parents,

There are few things in life as important as the health of your child, & vitamins play a key role in ensuring that he or she remains healthy. Receiving the proper level of vitamins on a daily basis promotes growth, protects against certain disease, assures good health and development, & provides proper metabolism.

Your locally owned Hillcrest Pharmacy is proud to introduce a program that provides access to high-quality vitamins to kids in our community-at absolutely no charge for one full year. Hillcrest Pharmacy Free Vitamin Program provides free vitamin supplements to children between the ages of 2 & 12 years old.

Through this innovative program, you may visit Hillcrest Pharmacy, provide some basic information, & receive a one-month supply of multivitamins for each child in your family. Stop in, meet our pharmacists today, & start your child on the road to a healthier life.

"An ounce of prevention is worth a pound of cure"
